

**Contents:**

A Study on Glycated Hemoglobin and Lipid Profile In Type 2 Diabetes Mellitus	01-06
WRKY genes Expression profile in Egyptian tomato (Edkawy cultivar) under drought stress	07-15
Analysis of Formalin Content by Some Types of Food Materials Using UV-Vis Spectrophotometry Method	16-19
Correlation of the study of autoimmune diseases and skin disorder like Vitiligo and different Thyroid disorders. A Prospective Randomized controlled study done at North-eastern region	20-30
Green Silver Nanoparticles induced apoptotic pathways and oxidative stress in cells of Culex pipiens larvae	31-39
Screening of Xylanase and Cellulase from Bacillus cereus F1C	40-43
Primer Design of the Amylase Gene from Bacillus cereus	44-49
Oxidative Stress Status and Serum Lipid Profile of Wistar Rats Fed Nigella sativa Oil and Canarium schweinfurthii Oil Formulated Feeds	50-56
Accumulation of slimy substances in large storage tanks for drinking and household water in Kanpur region	57-61
