

The study and teaching of a language cannot be divorced from its social context.

Mustafa Khalid Saleh Al-Rawi

MA English Language and Applied Linguistics (ELAL)

Assistant Lecturer at the department of English Language Cihan University – Sulaimanyah – Iraq

Abstract:- The aim of this study is to briefly discuss the relationship between language and culture and provide some examples of this relation from the perspectives of studying and teaching a language. It is important to understand the relationship between language and culture and to know which is controlling which. This paper somehow leaned towards the positive aspects of this relation and focused on educational systems that are flexible regarding cultural concepts when studying/teaching a language.

Key words : *Language teaching/learning, language and culture, code-switching, Language identity*

I. INTRODUCTION

Language is an abstract term which generally means “the method of human communication it is either spoken or written, consisting of the use of words in a structured and conventional way” (Oxford dictionary of English, 2005). Language is a means of communication between people of the same geographical place without regard of language globalization and language boundaries. People of the same geographical places (countries) usually have one language considered as their mother tongue and also they have the concepts of culture. Culture is also an abstract concept as it has many definitions in the literature rebutting general, is: the arts and other manifestations of human intellectual achievement regarded collectively (Oxford dictionary of English, 2005). From this definition, one may tell that there is an implication of communication within this definition and although one may think that without language (communication) cultural aspects and concepts would not be existed, while others think that it is culture that creates language. Since there is an overlapping between language and culture and each group of people of the same geographical place has their language and culture, there is a relationship between them (Holmes, J. 2013). It is important to understand the relationship between language and culture and to know which is controlling which. This essay will briefly discuss the relationship between language and culture and provides some examples of this relation from the perspectives of studying and teaching a language.

II. LANGUAGE STUDY

varieties and styles:

As mentioned previously that each group of people according to their geographical place has their language and culture, it is known that people of the same country may have, as linguists called, ‘language varieties’ and these varieties of the same language is due to cultural differences (Holmes, J. 2013). Sociolinguists and anthropologists indicated that the style of communication of a language (dialects, jargons) of a group of people is comprehended in a specific culture (Romaine, S. 2000). So, the shared language that a group uses is somehow showing their identity i.e. because their culture played roles in changing the general language and make it a dialect for them, this dialect is part of their cultural identity. Sapir, E and Whorf, B. L. (1956) established the hypothesis that “the fact of the matter is that ‘real world’ is to a large extent unconsciously built upon the language habits of the group. We see and hear and otherwise experience very largely as we do because the language habit of our community predisposes certain choices of interpretation”. The famous example of their hypothesis is the use of the word “snow” in the context of Eskimo and English languages. Therefore, language is used as a social tool and also shapes how people see the world and that is an example of the relationship between language and culture.

Code-Switching:

Code-Switching is the turning between two languages or may be more than two, in the case of multilingual or switching between the varieties of the same language, in the case of monolinguals and that is happened in the same context. So, it is the usage of a number of linguistic varieties syntactically and phonologically in one context (Romaine, S. 2000). People tend to use the codeswitching for functional purposes as Milroy, L. (1987) argued the identification of ‘prestige forms’ has been considered in the work of sociolinguists. The use of prestigious forms is somehow reflection not for the language and grammar purposes but for the cultural purposes and a proper example to that is Javanese language. Hudson, R.A. (1980), Trudgill, P. (1983), Coulthard, M. (1985) 2nd ed., and Holmes, J. (1992) seem to be interested in this language, because it has hierarchical system varieties and large number of lexical differences. So, for Javanese people, the language is different whether

Case Study:

AnotherexampleoftherelationshipbetweenlanguageandcultureisinthecasestudybyLupyan,G.andDale,R.(2010)Theyhaveanalysedstatisticallyalargenumberoflanguagesbyusinganumberof‘demographicsources’andtheWorldAtlasofLanguageStructures’.Itashasbeenfoundthattheresisasignificantlinkbetweenthedifficultyofalanguage(morphologically)andthespeakers’numberofthislanguage;demographically/sociohistorically,thecomplexityofalanguagedependsmostongeographicalubiquitousnessofthislanguageanditsusage(ibid,2010).Theyfoundthatifalanguageisspokenbyalargenumberofpeopleand(is)widelyspread,thenthislanguageislesscomplexmorphologically,duetotheadaptation‘socialenvironments’i.e.becauseitiswidelyspreadpeopleismorelikelytosimplifytheirlanguagestructuresinordertoinvolveddiverse rangeofspeakersfromdifferentethnicgroupanddifferent‘linguisticbackgrounds’(ibid,2010).Thelinkbetweensocialcontextandlanguagechangeissomewhatobvious.Languagesaremorelikelytobelesscomplexthanbefore,becauseofthesocietalpowerofpeopletochangeandsocialaspectsmightbesubjecttochangethroughtime,sotherelationshipbetweensocietalpowerofchangeandtheactualchangeinlanguageseemstobedynamic(Lupyan,G.andDale,R.2010).Nettle,D.(1998)andHay,J.&Bauer,L.(2007)(citedinLupyan,G.andDale,R.2010)alsoarguedthattheresisarelationshipbetweenthestructureofalanguageanditssocialenvironment,andalsohavefoundthatnotonlythesocialenvironmenthasrelationstotheleguagestructure, buttothe‘physicalaspectsoftheenvironment’too.ThisrelationshipbetweenphysicalaspectsoftheenvironmentandlanguagestructurehasalsobeenarguedbyMuntoeR.I.etal.(2009citedinLupyan,G.andDale,R.2010).Inaddition,mentioningagainSapirWhorfexampleoftheword‘snow’;itsdifferencesbetweenEnglishandEskimolanguagesisprobablyaphysicalaspectoftheenvironment,maybebecausetheEskimo’sexposuretosnowisdifferentfromEnglish’sandthatwhatchangedthemeanng.However,socialenvironmentismoreprominentintheliterature.Lupyan,G.andDale,R.(2010)hasdividedlanguagesintotwo principlesaccordingtotheiruseandspeakers’number:‘exoteric’whicharethelanguageshatarewidelyspreadandspokenbyalargenumberofpeoplefromdifferentbackgrounds,forinstance:Englishand‘esoteric’whicharethelanguageshatarenotsreadandspokenbysmallnumbersofpeople,forinstance:Tatar.Therefore,thesocialenvironmenthasmoreeffectontheexotericlanguagesdueto:firstly,thespreadoftheselanguageswhichmightbedifficulttostayasisitisindifferentgeographicalplacesandsecondly,becauseofthelargenumberofspeakers,especiallynonnatives, the force toward change may be stronger, and the change tend to be always towards the simpler not the complex.

III. LANGUAGE TEACHING

Inthestudyof‘communicativelanguageteaching’thisistheteachingofalanguagethroughthefocusoncommunication(interaction),Woods,D.andCakir,H.(2011)argue thattherearetwo‘dimensions’regardingtheteachers’knowledge;Thefirstdimensionis‘personalimpersonal’andthesecdoneis‘theoreticalpractical’whichmeansthattheresisarelationshipbetweentheteachers’knowledgeandbeliefs.Therefore,teachersmayfindthemselvesinthe positionofreflectingtheir‘culture’whileteachingaslongasconsideringbeliefsasimportantpartofculture.Thesetwoteachers’dimensionsaresomehowinterrelated;teachers’obtainedknowledgeandthinkingwhichistheimpersonalsideareappliedtotheirtheoretical‘explicit’knowledgeandwhattheyareactuallydo(implicitly)inpractice(ibid,2011).Asthereisanoverlappinginthe personalimpersonaldimensionteachersseemtousestheirbeliefstheoreticallyandpracticallyi.e.their‘objectivity’seemsto beaffectedbytheir‘subjectivity’(ibid,2011).Itisnotdefinitethatteachersusetheirculturalbeliefswhileteaching.However,inliterature,ithasbeenfoundthatteachersreflecttheirculturalviewsintheircontext.Personally,Ithinkitdependsonthe culturalcontextthatteachersuse.Althoughsometimesthereteachers’students’beliefsdifferencescommunicativelanguageteachingtendtomakethesedifferencesbeneficialinawaytoknowhowpeoplefromotherculturesthinkandasaproach,itisanimportantexampleto relate languageteachingtoculture.Anotherexamplefromtheteachers’perspectiveswhileteachingalanguageistheresearchconductedbyBlanchetCohen,N.andReilly,R.(2013)inQuebecwhichisamulticulturalurbanlocale.Ithasalargenumberofstudentsfromdifferentbackgrounds,whichmakedifficultyineducationsystems.BlanchetCohen,N.andReilly,R.(2013)highlightedthe‘environmentaleducation’tosolvethiproblemoftislocale;the problemiswiththeculturalsignificantdiversityencounteredbytheeducationsystem.“Researchinternationallyshows that educationsystemsthatembracinglinguisticdiversityaremmostbeneficialtostudentlearning,fosteringacademicachievement,selfesteemandconfidence”(Cummins,2007Falbo&deBaessa,2006;Kymlicka,2003citedinBlanchetCohen,N.andReilly,R.2013)However,thecclaimofQuebeceducationsystemistopursueunifiedvaluesthatembracetheFrenchlanguageandculture;andthatwhatputpressureonbothstudentsandteachers(BlanchetCohen,N.andReilly,R.2013).Ibid(2013)offeredenvironmentaleducationasasolvingtothesepressuresbecauseitcontainsvariablemethodsofteachingthatsomehowseparatethedominanceofoneculturalconceptsfromtheeducationsystem.Althoughthissystemofeducationhasanumberoflimitations,itisapositivesystemprovidessignificantopportunitiesnotonlyinteachingalanguagbutalsotoachingin general.

IV. CONCLUSION

To sum up, this essay highlighted the issue that there is a relationship between language and culture, and showed briefly some examples of this relation from the perspectives of studying and teaching a language. This relation seems to be obvious; the controversial issue is whether this relation could affect positively on studying/teaching a language or not. This paper is somehow leaning towards the positive side of this relation and focused on educational systems that tended to be flexible regarding cultural concepts or may be do not have cultural dominance when studying/teaching a language. Finally, the separation of language and culture is slightly difficult, because it is suggested that culture is part of the identity of the language.
