

**Contents :**

Effect of Heat Treatment Process Parameters on Tensile Strength Properties and Hardness of the Recycled Aluminium Alloy	01-07
Innovative design of cross flow hydro turbine system for Hhaynu micro-hydropower plant – Mbulu, Tanzania	08-18
Stability Analysis of Thin CSCS and CSSS Isotropic Plates Subjected to Vibrational Loads	19-27
Problems and Prospect of Energy Storage Technology and Its Application in Power Systems	28-33
Application of Coconut Shell as a Partial Replacement of Coarse Aggregate in Concrete	34-37
Finite Element Modelling and Parametric Analysis of Thin Reinforced Concrete Slabs Strengthening by CFRP Laminates	38-46
Modelling and Analysis of Carbon Fibre Brake Pedal for BAJA SAE	47-51
Effect of Partial Replacement of Cement with Banana Stem Ash on Compressive and Splitting Tensile Strengths on Concrete	52-58
Modelling and Analysis of Carbon Fibre Brake Pedal for BAJA SAE	59-63
